PAVEMENT ANALYSIS SERVICES

About

The Pavement Analysis Services program allows participating entities to choose from any of four highly qualified vendors to contract for pavement analysis services.

Previously, if a municipality wanted to analyze the pavement in their community, they had to procure for vendors individually. Due to the nature of these services, a high equipment mobilization fee would be included in the vendor's fees. NCTCOG SHARE has completed the competitive procurement on a regional level and due to the expected number of users, vendors' fees are lower as the equipment will be continually mobilized in our region. Pavement analysis services are also more efficient at a bulk level, which will lower costs for smaller cities by participating in a regional program.

Participating entities can choose from a variety of menu options within the pavement analysis services, including digital image collection, ADA ramp location and configuration, Pavement Condition Index (PCI) scores, budget estimates, and training. A full menu of options can be found on our website.

How to Participate

If you have not already done so, visit the "I want to buy" page on our website and complete a SHARE Master Interlocal Agreement. Email the executed pages to us. Please note that electronic copies have the same legality as original signature pages. A fully executed agreement will be returned to you via email.

An Engagement Letter/ Request for Service will also need to be executed between you and the chosen vendor. Those documents are included on the SHARE Pavement Analysis Services page.

Contact Us

For questions about SHARE or the Pavement Management Program, contact us at NorthTexasSHARE@NCTCOG.org.
