

Multimodal/Intermodal/High Speed Rail/Freight Subcommittee

This Subcommittee's responsibility is to develop more thoughtful approaches to the region's multimodal/intermodal needs for both people and goods. Reducing traffic congestion within corridors and bottlenecks between modes, increasing efficiency and safety, and improving air quality require a more cohesive transportation approach. This Subcommittee will review options for corridor selection, mode selection, corridor priorities, and funding associated with rail and intermodal facilities. In addition, the Subcommittee will maintain a dialogue on issues of common interest with the private sector and investigate opportunities for partnerships. The Subcommittee will also include representatives from the private sector freight and potential high-speed rail providers.
